Waypoints

We have started replacing GPS waypoints such as [39° 9.77N 23° 25.59E] with What3words addresses such as *///mitten.hygienist.signify*, which is fully compatible with GoogleEarth. You can find out about [what3words here](#) and “Easily find a what3words address for anywhere in the world. We have divided the world into 3m squares and given each square a unique combination of three words. What3words addresses are easy to say and share, and as accurate as GPS coordinates.” Simply load the app onto your phone or computer and copy the address in. In this ample walk, we’ve included both versions.
